■ How to use?

1. Connect to the power strip into the wall socket or surge protector.
2. Press the switch to start charging.
3. Connect your mobile devies with your original charging cable (not included) to the power strip for charging.
4. Remove devices from the Power Strip when charging is finished, then turn off the power strip or remove it from the wall socket.

■ Warning

1. Use indoor and in dry locations. Not for use with aquariums and other water-related products.
2. Risk of fire: Do not exceed electrical rating.

■ Notice

1. The Power Strip may be a little warm when you use it to charge multi devices, it's normal.
2. The power supply shall be shutdown when output voltage reaches to its over-voltage protection trigger point 6V Max.
3. When USB output short-circuit happened, the USB will stop working and turn to protection state. Remove the fault equipment, it will recover automatically.
